HONOUR CHUKWUKA

SUMMARY

I am a proficient and smart full stack javascript developer and engineer with 2 years of development experience. I do my best to stay on top of changes in the software development space so that I can meet challenges with tools well suited to the job at hand. Softwares i've built includes, Jobtracker App, budget tracker app, Githubfinder app e.t.c

Software Engineer at **Decagon** (January 2022 – PRESENT)

Responsibilities

- Handled Database Management System with SQL like MySQL, Postgres, MongoDB.
- Experience writing unit and integration test.
- Implemented a Transfer service API with TypeScript, Node.js, Express.js, Docker, MongoDB
- Built several endpoints using graphql and rest api.
- Built Api endpoints for an electronic voting app using Node js utilizing jwt for the authentication.
- Built the get all jobs and get all applications endpoints for an IT app called apogga using Node js, typescript, express and ran tests using supertest and jest
- Implemented a transfer service app using Node, typescript, express, mongodb and docker
- Exposure to scrum and agile methodologies

Technology Stack: Javascript, React, React Hooks, React Styled Components, Redux, HTML, CSS, NodeJs, Express, Bootstrap, MaterialUI, MongoDb, TailwindCss, DaisyUI, MySql, Docker, Postgres Typescript, Graphql, TailwindCss.

Software Engineer at **Ndf** (2020 - 2022)

Responsibilities

- Worked with css and materialUI in designing the agency app
- Implemented search for agencies functionality in the agency app
- Leveraged mvc pattern to organize AngularJs Controllers, Custom directives.
- Worked with business analysts to understand the project models and goals.
- Worked on the rest api to create the services for the agency app
- Cooperating with the back-end developer in the process of building the RESTful API.
- Using various features in AngularJs like data binding,routing, custom filters, custom directives to meet various custom requirements.

- Manipulated data using crud(create, read, update and delete) operations for mySql database

Technology Stack: AngularJs, HTML, CSS, Bootstrap, MaterialUI

PERSONAL PROJECTS

JobTracker: It is a webApp that allows users to keep track of all job applications made by the user. A job application might be pending, interviewed or declined.

Technology Stack: React, React Hooks HTML, CSS, ExpressJs, Typescript, NodeJs, Heroku

Budget Tracker: It is a simple react app that allows a user to add budgets and also add expenses for each budget.

Technology Stack: Html, css, bootstrap, React, React Hooks

Github Finder: It is a finder app that allows a user to search for github users and view individual github user details.

Technology Stack: Html, css, ReactJs, tailwindCss, DaisyUI, React Hooks

Starwars: It is a simple website that renders all star wars characters using the starwars api.

Technology Stack: Html, Css, vanilla js

EDUCATION

BSc Plant Biology and Biotechnology – **University of Benin, Edo State**

October 2016 – November 2020

Second Class Upper – Bachelor of Plant Biology and Biotechnology

LANGUAGES AND TECHNOLOGIES

- **Frontend**: HTML, CSS, jQuery, ReactJs, React Styled Components, FramerMotion, AngularJS, Redux, Typescript, MaterialUI, NextJs, React Hooks, TailwindCss, DaisyUI, Bootstrap, Ant Design
- **Backend**: NodeJs, MonogoDb, MySql, Express framework, firebase, PostgreSQL, Typescript
- **Others:** Jira, Git, Supertest, jest, Morcha, Chai, Docker, Heroku, Netlify, Scrum
- **In View**: Blockchain Development, Flutter, React Native, VueJs
